Reliability of P(spike up) before and after isotonic recalibration (fitted on calibration)
Calibration (cross-fitted halves): 123 upward crossings at 49890 eligible origins
raw: Brier 0.00186, log loss 0.0078
isotonic: Brier 0.00202, log loss 0.0091
observed frequency
forecast P(spike up), bin mean
Test: 403 upward crossings at 36921 eligible origins
raw: Brier 0.00852, log loss 0.0324
isotonic: Brier 0.00853, log loss 0.0312
observed frequency
forecast P(spike up), bin mean
